# AEROENFRIADORES

## Dry Coolers

El empleo de aeroenfriadores (Dry cooler) permite a partir de las condiciones exteriores de temperatura del aire enfriar un fluido en circuito cerrado.

Equipos de marcado carácter industrial, robustos y modulares para instalar directamente en la intemperie.

The use of dry air coolers (dry coolers) allows, from the external conditions of air temperature, to cool down a fluid in a closed circuit.

Units of noticeable industrial character, robust and modular to install directly in the open air.

**AWS / AWS SERIES**

**AWD / AWD SERIES**

**AWSV / AWSV SERIES**

**AWDV / AWDV SERIES**

## CARACTERÍSTICAS GENERALES / GENERAL FEATURES

La gama AWSV corresponde a los aeroenfriadores, con doble batería dispuesta en "V" y una fila de ventiladores, disponibles en versiones estándar y de bajo nivel sonoro (Silenciosos). Cubriendo potencias que van desde 130 kW hasta 964 kW.

Estructura compacta de gran robustez construida en chapa de acero galvanizado para montaje sobre bancada mediante incorporación de elementos antivibratorios adecuados. Provista de puntos de anclaje y puntos de izado para su manipulación. La versatilidad de su estructura permite que puedan ser montados tanto en disposición horizontal como en vertical mediante la utilización del kit adecuado en cada caso.

El chasis y la envolvente se encuentra protegida en su totalidad mediante aplicación de polímero tipo poliéster termoendurecible de alta resistencia a la corrosión, que le confiere una máxima resistencia a la intemperie. Aplicado pieza a pieza previo a su ensamblaje en color RAL 7004.

Los equipos de esta gama están equipados con baterías de intercambio construidas con tubo de cobre y aletas de aluminio con perfil "V Baffle" de alto rendimiento y expansionada mecánicamente para un control perfecto entre aleta y tubos, dotados con terminación roscada o entrada según diámetro, todos ellos de colectores de acero según UNE EN 10255.

Los ventiladores incorporan motores asíncronos trifásicos de rotor externo con grado de protección IP 54, aislamiento clase F, con posibilidad de conectarlos en estrella o en triángulo, disponiendo de esta manera de dos velocidades de funcionamiento.

Adaptación a las condiciones más restrictivas de ruido, ofreciendo esta gama motores de ventiladores con diferente número de polos.

AWSV series corresponds to the range of dry coolers with two coils arranged in "V" shape and a single row of fans, standard and silent (low noise) versions are available. It covers a range of capacities from 130 kW up to 964 kW.

They have a compact structure with high robustness built with galvanized steel for mounting on a bench by incorporating appropriate anti-vibration elements. They are provided with anchor and lifting points for handling. The versatility of the structure allows units that can be assembled both horizontally and vertically using the appropriate kit.

The chassis and casing are fully protected with a polymerized and thermosetting painting with high corrosion resistance that confers maximum weatherproofing. It is applied in RAL 7004, piece by piece prior to its assembly.

Dry coolers in these series are equipped with heat exchange coils built with copper tube and aluminum fins with profile "V-Baffle" of high performance and mechanically expanded for a perfect control between fins and tubes. They are equipped with threaded end or inlet according to diameter, all of them made of steel manifolds according to UNE EN 10255.

The fans incorporate three-phase asynchronous external rotor motors with IP 54 protection level, class F insulation, with the possibility of connecting them in star or delta, having in this way two speeds of operation.

Adaptation to the most restrictive noise conditions, offering this range fans motors with different numbers of poles.

# SERIE AWSVN / AWSVN SERIES

## SERIE AWSVB / AWSVB SERIES

- Condiciones de cálculo se establecen de acuerdo a lo establecido en la norma EN 1048. T<sup>o</sup> Ambiente= 25°C; Fluido= Agua; T<sup>o</sup> entrada agua= 40°C; T<sup>o</sup> salida agua= 35°C.
- Los niveles de presión sonora se indican a una distancia de 10 metros en condiciones de campo libre y son utilizables únicamente para efectos comparativos, en caso de requerir un estudio más detallado, póngase en contacto con el Departamento Técnico de INDITER.
- Para equipos que monten ventiladores EC, póngase en contacto con el Departamento Técnico de INDITER.
- El peso del equipo se considera en vacío.
- Si no encuentra un equipo que se adapte a las condiciones de su instalación, póngase en contacto con el Departamento Técnico de INDITER.

- Calculation conditions are established according to the provisions in EN 1048. Room (environment) temperature = 25°C; water inlet T = 40°C; water outlet T= 35°C.
- Sound pressure levels are indicated at a distance of 10 meters in free field conditions and are usable only for comparison purposes, in case a more detailed study is required, please contact the Technical Department of INDITER.
- For units with EC fans, contact the Technical Department of INDITER.
- The weight of the units is considered empty.
- If you do not find a unit that fits to the conditions of your installation, contact the Technical Department of INDITER.

# SERIE AWSVN / AWSVN SERIES

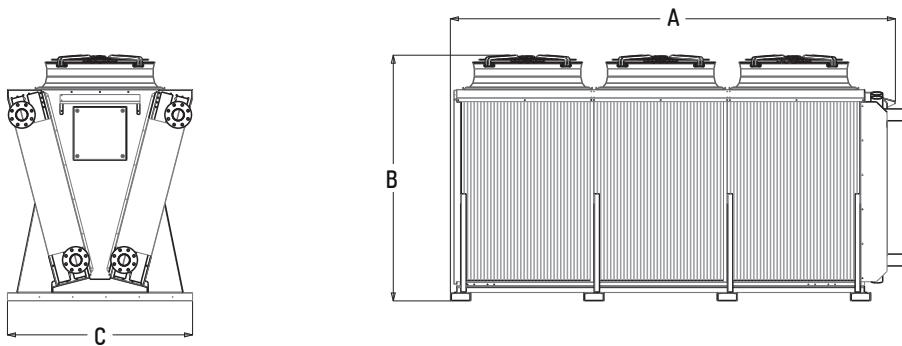

- Condiciones de cálculo se establecen de acuerdo a lo establecido en la norma EN 1048. T<sup>o</sup> Ambiente= 25°C; Fluido= Agua; T<sup>o</sup> entrada agua= 40°C; T<sup>o</sup> salida agua= 35°C.
- Los niveles de presión sonora se indican a una distancia de 10 metros en condiciones de campo libre y son utilizables únicamente para efectos comparativos, en caso de requerir un estudio más detallado, póngase en contacto con el Departamento Técnico de INDITER.
- Para equipos que monten ventiladores EC, póngase en contacto con el Departamento Técnico de INDITER.
- El peso del equipo se considera en vacío.
- Si no encuentra un equipo que se adapte a las condiciones de su instalación, póngase en contacto con el Departamento Técnico de INDITER.

- Calculation conditions are established according to the provisions in EN 1048. Room (environment) temperature = 25°C; water inlet T = 40°C; water outlet T= 35°C.
- Sound pressure levels are indicated at a distance of 10 meters in free field conditions and are usable only for comparison purposes, in case a more detailed study is required, please contact the Technical Department of INDITER.
- For units with EC fans, contact the Technical Department of INDITER.
- The weight of the units is considered empty.
- If you do not find a unit that fits to the conditions of your installation, contact the Technical Department of INDITER.
